_____		_____		_____	_____
_____		_____		_____	_____
_____		_____		<b>Total</b>	_____
_____		_____		<b>GRAND TOTAL*</b>	
_____		_____		_____	

## Alternative methods for determining valuation:

The home insurance industry often recommends a protection amount for household contents equal to 50% or more of the value of your home. Factor in high value items such as art, antiques, crystal and collectibles.

### For Example:

Home Value: \$150,000  
 Protection %: x 50%  
 Protection Level: \$75,000

### Your Home:

Home Value: \_\_\_\_\_  
 Protection %: \_\_\_\_\_  
 Protection Level: \_\_\_\_\_\*

Independent insurance actuaries have determined an average household today represents a value of \$6-\$8 per pound.

### For Example:

Shipment Weight: 10,000 lbs.  
 Value/Pound: x \$8  
 Protection Level: \$80,000

### Your Home:

Shipment Weight: \_\_\_\_\_  
 Value/Pound: \_\_\_\_\_  
 Protection Level: \_\_\_\_\_\*
